Child Care Outreach Program Presents:***

***What is Sensory-Enrichment Therapy (SET)? &
Applied Behavior Analysis for the Classroom***

When: Saturday, February 23, 2019

Time: 9:00 AM—4:00 PM

Sign In Time: 8:45 AM

Presented by: Rebekah Reed, MS., PSET &
Sonia M. Harrell, MA, MDA, BCBA

Summary of Training: Sensory Enrichment Therapy is a newer treatment modality that merges sensory work, developmental and occupational approaches and mental health counseling. It was developed from the “ground up” method of activating brain cues and manipulating sensory experiences. It is specially and individually designed for children and young adults with neurological disorders, developmental disorders, spectrum disorders, varying sensory sensitivities and or high levels of anxiety. The benefits of Sensory Enrichment Therapy are both short-term and long-term enhancements in brain functioning that lead to an overall improved quality of life.

Applied Behavior Analysis for the Classroom: Participants will learn environmental manipulations and how to use these to your advantage. Discuss how to choose the appropriate consequences to behavior. What we really mean by reinforcement. Goals and data collection and you will be ready to use this in the classroom strategies.

Earn 6 in-service hours in Competency Area 4 – Teaching & Learning
Environments & Interactions

Funded by the Juvenile Welfare Board

Training is free for licensed child care providers.

*Trainings will be held at R' Club Child Care, Inc.
4140 49th Street N, St. Petersburg, FL 33709*
